MPH in Maternal and Child Health

Awarded By James Lind Institute

EduQua Certified Institution

Masters in Maternal and Child Health

100% online | Duration: 1.5 - 2 Yrs | Credits: 138 ECTS

Program *Overview*

The MPH in Maternal and Child Health program is designed for students to develop a keen understanding, critical thinking, and key skills needed to find solutions to important health challenges facing women and children across the globe. After completing this specialization, students are expected to apply their knowledge and skills within this key health domain. Students who complete this program usually find opportunities to work within the health system with a focus on maternal and child health.

Jannie Zibiri
MPH - Health Economics & Policy

Program *Overview*

CREDITS **138 ECTS**

What You Will Study

The program is comprised of 138 ECTS credits and can be completed in about 18 months. For a detailed list of courses taught in this program, please refer to the curriculum.
After completion of 42 credits, an interim qualification of Advanced Diploma in Public Health Management is awarded. This part of your studies only includes coursework. This is followed by the completion of additional 72 credits via coursework and 24 credits via dissertation under the guidance of a mentor.

How You Will Study

This program is conducted fully online in an asyncronous format.
Once you are enrolled you will be provided a username and password to login to our e-Campus. All the courses that you are supposed to study will be available in your account. You can log in and complete your courses at any time of your convenience. Study materials are provided in the form of lectures, reading materials, additional videos, research papers, and so on. The faculty can be contacted for any assistance when required. All tests and assignment submissions also take place via the e-Campus. For more information please refer to the online learning section of the website.

Eligibility Requirements | Career Outlook | Fees & Funding* | How to Apply

Eligibility

Bachelor's degree (or equivalent / higher)
This program requires a bachelor's degree or an equivalent recognized academic title, preferably in a life science-related area. If you are unsure about your eligibility, please reach out to our admission staff.

Required Documents

- A passport size photo (head and shoulders only)
- Copy of identity proof e.g. a copy of passport or any other government-issued identity card
- Copy of bachelor's degree or equivalent (degree/higher national diploma etc.)
- Copy of academic transcripts/marks sheets from the bachelor's degree
  Additional requirements if opting for the dual degree pathway:
- Copy of High School Diploma / Secondary School Certificate
- CV

Language Proficiency

This program is taught in English. Therefore, you should be comfortable in using English as a language of communication (reading, writing and speaking). If you have taken an English language test in the last two years, that is good to have. If not, you can explore a waiver for the English language test.
English proficiency test is waived for applicants who are:

- Native English speakers.
- Graduates of English-medium institutions.
- Have at least 2 years of work experience in an English-speaking organization.

Entry Requirements | Career Outlook | Fees & Funding* | How to Apply

An infectious disease specialization offers public health professionals a variety of rewarding career options. Infectious disease training and skills make you well suited to a variety of roles in public health. The program provides a focussed understanding of communicable diseases and strengthens your skills for developing policies and strategies for their treatment, surveillance and control. The MPH infectious disease program at JLI will help provide a trained workforce for the public health systems.
